Group photo at fusolab

Battlemesh tracks

- Routing protocols for ad-hoc networks, like Babel, B.A.T.M.A.N., BMX6, OLSR, 802.11s and Static Routing.
- Community networks: ninux.org, guifi.net, funkfeuer.at, freifunk.net, altermundi.net
- Firmwares: libremesh.org, gluon.readthedocs.org
- Routers: turris.com, librerouter.org
- Updates on openwrt.org

Routers: Turris Omnia and Librerouter were presented!

Routers: Turris Omnia and Librerouter were presented!

Sponsors

- APC funded travel scholarships
- Fusolab donated the space, network for the event and the streaming support
- eXO helped on the preparation of the event
- Freifunk sponsored a social event (free pizza!!)

Big thanks to ROMHACK!

They inspired us to make battlemesh v14 happen in Rome

Thanks for your time!

Time for your:

- Questions
- Suggestions
- Feedback
- etc.
